

Elephants and Optimality Again

Tamás Biró, CLIN, Jan. 22, 2009

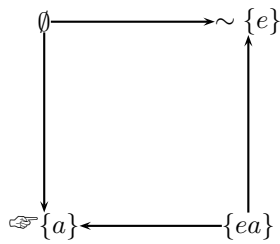

Figure 1: Candidate set 1 (a.k.a. search space, neighbourhood structure, topology) *without* insertion of third elements not present in the context into the reference set.

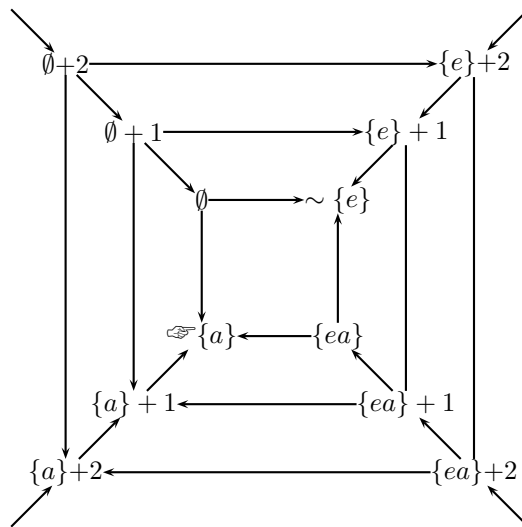

Figure 2: Candidate set 2 (a.k.a. search space, neighbourhood structure, topology) *with* insertion of third elements not present in the context into the reference set.
